# Infrared Therapeutic Pet Pads

## Helping pets cope with pain.

Thermotex pet beds are ideal for:

- ◆ post surgery recovery
- ◆ arthritis, bursitis, and strains
- ◆ muscles or joints that are causing pain.
- ◆ animals who need extra warmth

- ◆ Onside measures 33" X 40" X 1½"
- ◆ Uses 110 volt, 35 watt power
- ◆ Polyester Blend top / nylon bottom

Large Pet Pad

- This x-ray shows severe hip arthritis in a dog.
- This degenerative joint disease causes pain and suffering for the animal.
- Thermotex infrared therapy beds promote blood flow which reduces inflammation and delivers an analgesic effect.

Velcro opening for easy heat panel and foam removal prior to washing the bed cover

### How does it work?

Thermotex Therapy Systems deliver pain relief by increasing the blood flow.

- \* Increased blood flow is accomplished by using infrared energy absorption.
- \* Infrared energy is absorbed by the body to a depth of 6 cm or 2.36 inches.
- \* Infrared is a radiant energy source similar to the warmth felt by sunshine with no harmful rays.
- \* As the infrared energy is absorbed, the blood flow and oxygen levels increase in the treated area.
- \* This results in deep penetrating warmth.
- \* This deep penetrating warmth delivers pain relief and assists with elimination of toxins.
- \* Infrared is so safe, it is used to warm newborn babies in hospital.

### Product Features

- \* Inexpensive to operate: Thermotex Therapy Pet beds cost around 7 cents a day to operate for 24 hours.
- \* Machine Washable cover.
- \* No Burning: Thermotex Therapy Systems are thermostatically controlled and will never overheat.
- \* Safety and simplicity of operation: Just plug the unit into any 110 volt outlet, set on low and leave it.
- \* Uses 110 volt power; 35 watts.

### Patents and Certifications

- \* Patents pending
- \* CSA / UL approved
- \* Products are manufactured in a certified ISO 9001:2000 plant
